# TENDO Silver

## The specialist for drilling applications in DIN contour

Engineered without compromise. The TENDO Silver combines the advantages of hydraulic expansion technology with an attractive pricing structure. So benefit from lightning-fast tool changes, excellent vibration-damping features, and a run-out and repeat accuracy of micron precision.

The TENDO Silver has been developed for a variety of applications and seamlessly adapts to a wide range of machining requirements. The robust design of the TENDO Silver not only enhances rigidity for demanding machining tasks, but also ensures additional flexibility and comprehensive compatibility with intermediate sleeves and extensions from SCHUNK.

### Your added value:

- + Excellent vibration damping
- + Precise length presetting
- + High flexibility
- + Dirt grooves for reliable torque transmission

# TENDO E compact

The all-rounder for volume machining, milling, drilling, reaming, threading and HPC machining

Tight tolerances, enormous cost pressure, greater accuracies – TENDO E compact is the answer to increasing demands in volume cutting that can no longer be economically achieved by ER collets, heat shrinking toolholders, WELDON mountings and technically inferior hydraulic expansion toolholders.

The TENDO E compact impresses with a price that makes the switch from mechanical and thermal toolholders to the significantly more precise TENDO quality easy.

## Your added value:

- + Excellent vibration damping
- + Highest torques
- + Versatile
- + Lightning-fast, micron-precise tool changes without peripheral devices

# SCHUNK intermediate sleeves

Increased efficiency in no time at all

SCHUNK intermediate sleeves allow for clamping multiple different shank diameters with just one toolholder.

The universal GZB-S intermediate sleeves are available in two versions: tried-and-true coolant-tight and with innovative peripheral cooling. Both can be used in the SCHUNK toolholder systems TENDO, TRIBOS, and SINO-R as well as in commercially available hydraulic expansion toolholders and power toolholders.
